VISUAL PRECISION YOU CAN COUNT ON

Ultra Wide-Angle Lens
with 3X Optical Zoom and Quick Focusing

A bright F1.2 lens with an ultra-wide 101.2° (VB-M600VE & VB-M600D) and 102.5° (VB-M700F) horizontal field of view to capture a generous portion of the frontal area. The 3X optical zoom also plays an integral part in magnifying small subjects while the Electronic Rear Focus System ensures that subjects being tracked by the camera continue to remain in focus while zooming in and out.

VB-M600 Electronic Adjusting Mechanism
(During Installation Only)

ACTION	DETAIL	ADJUSTABLE RANGE
Pan	Adjusts left and right motion of the camera	-175° to +175°
Tilt	Adjusts up and down motion of the camera	-75° to +75°
Rotation	Adjusts direction of rotation of the image	-175° to +175°

Adjusting the field of view during installation is now easier with the electronic adjusting mechanism of the VB-M600VE and VB-M600D. Users are able to remotely pan, tilt, rotate and zoom until the desired field of view is achieved, using the default setting tool software.

SAFEGUARD PRIVATE INFORMATION

Prevent invasion of privacy and sensitive information from falling into the wrong hands with the Privacy Mask function. By creating up to eight user-defined colored rectangles, any area in the camera's view can be digitally masked to further enhance security measures.

EASY INSTALLATION WITH PoE

VB-M700F / VB-M600

LAN CABLE   PoE HUB

MAX. 100 M (328.1 ft)

Power over Ethernet (PoE) technology enables the network cameras to receive both data and power through a single LAN cable. Once the camera is connected to a PoE-enabled hub, no additional electrical installation work is required.

UNMATCHED IMAGE CAPTURE QUALITY

Exemplary Low Light Performance

With an intelligent Day/Night function that boosts the camera's sensitivity to light by up to 10 times, surveillance in dimly-lit environments poses no problems. In addition, a Smart Shade Control function also aids in brightening underexposed areas and boosting contrast levels.

High Quality Compression H.264

Using the versatile H.264 image compression format means that network transmission speeds are kept swift and smooth even when streaming full-frame 1280 x 960 pixel (1.3 megapixel) images at 30 frames per second.

KEEPS YOUR WORLD RUNNING SMOOTHLY

Canon's 1.3 megapixel network cameras, the VB-M600VE, VB-M600D and VB-M700F have their sights on becoming the most utilitarian surveillance solution in the market. Featuring a medley of cutting-edge technologies that promise vantage viewing round-the-clock, business owners can finally put their security concerns to rest.

From the ability to pan and tilt in sweeping arcs, to the precise optics, advanced detection technology, and user-friendly interface of the bundled software, the latest Canon network cameras will tackle your monitoring requirements, big or small.

FULL-FEATURED DETECTION CAPABILITIES

Through the process of complex algorithms, the latest 1.3 megapixel network cameras are able to offer an unprecedented level of detection, including the ability to detect abandoned or moving objects in a frame.
DETECTS ABANDONED OBJECTS   DETECTS MOVING OBJECTS   DETECTS TAMPERING OF CAMERA   DETECTS AMBIENT SOUNDS   DETECTS REMOVED OBJECTS
SEAMLESS INTEGRATION WITH EXISTING NETWORK

By fully supporting the Open Network Video Interface Forum (ONVIF) communication standard, other ONVIF-enabled hardware like storage servers and third party viewing software can instantly leverage on the cameras' functionality without having to deal with proprietary configuration settings.

INTUITIVE SOFTWARE INSPIRES EASY CONTROLS

The network cameras place a heavy emphasis on usability and this could not be better amplified than the hassle-free Admin Tools and bundled Recording Software. Admin Tools allow the camera's various settings to be controlled via any computer browser, so surveying from different terminals in the same LAN network is a breeze. The bundled recording software, RM-Lite, has been specially developed to allow recording from up to 4 cameras, making it ideal to monitor small environments without the need to purchase additional software.
